

The Influence of Planets in our Lives.

A big big thank you to Jnana.

There are 12 months within a year and every month is controlled by a planet whose influence either affects us positively or negatively. The best profession, the best partner, the kind of ailments you would be encountering, etc are determined by the day you were born...

There are occasions when you feel motivated and feel life is worth living and receive encouragement from within but there are also occasions when you feel so down, dejected, and think life is not worth it, all this is the effect of the date you were born.

If you are able to identify your potentials and shortcomings, what you are good at, and what you should abstain from, life becomes interesting...

That's why it's necessary to know the following.

Aquarius 20th January to 18th February.

Ruling Planet.....Saturn & Uranus

Symbol.....The Water Bearer

Element.....Air

ColourElectric Blue, Grey, Ultramarine Blue
